

EAS4CUT COOLANT PORTFOLIO

For a comprehensive understanding of coolants **purpose** and **types**, please refer to our full **articles**.

IF YOU PREFER A BRIEF OVERVIEW OF OUR PORTFOLIO, PLEASE SEE BELOW:

UNI301

Our best-selling coolant for **general machining** across various materials, providing an exceptional price-to-value ratio.

PRO301

Specifically designed for cutting aluminum, this is the recommended coolant if **aluminum is your primary focus**.

BASE201

Fluid for **non-heavy machining**, including conventional machines operation and band saws.

VEG001

Ester oil-based fluid for those prioritizing **environmental safety** and seeking **excellent cutting performance**, including for aluminum.

FORM121

Ester oil-based fluid or high-performance **forming operations**, incl. **stamping and drawing**.

SYN291CO

Fully synthetic fluid for **carbide grinding** which avoids cobalt leaching.

EDM601

Our dielectric fluid is specially formulated for die-sinker **EDM** machines.

NMO121

12 mm²/s neat metalworking oil for light to medium duty general machining incl. gun drilling.

NMO241

24 mm²/s neat metalworking oil for medium duty machining, incl. deep hole drilling and broaching.

NMO361

36 mm²/s neat metalworking oil for heavy duty machining, incl. gear cutting manufacture.

WL68 / WL220

Slide-way lubricants specifically designed for use in metalworking equipment.

LQ20T

Essential and simple tool for fluid maintenance.

S240

Innovative oil skimmer with impeller and adjustable independent stand for CNC machines.

168MFG

FullShop™, Automated Coolant Management Solution.

Product	Type	Main purpose	Mineral oil content, %**	P Steel	M Stainless Steel	K Cast Iron	N Non-Ferrous (AL)	S High-Temp Alloys	H Hardened Materials
