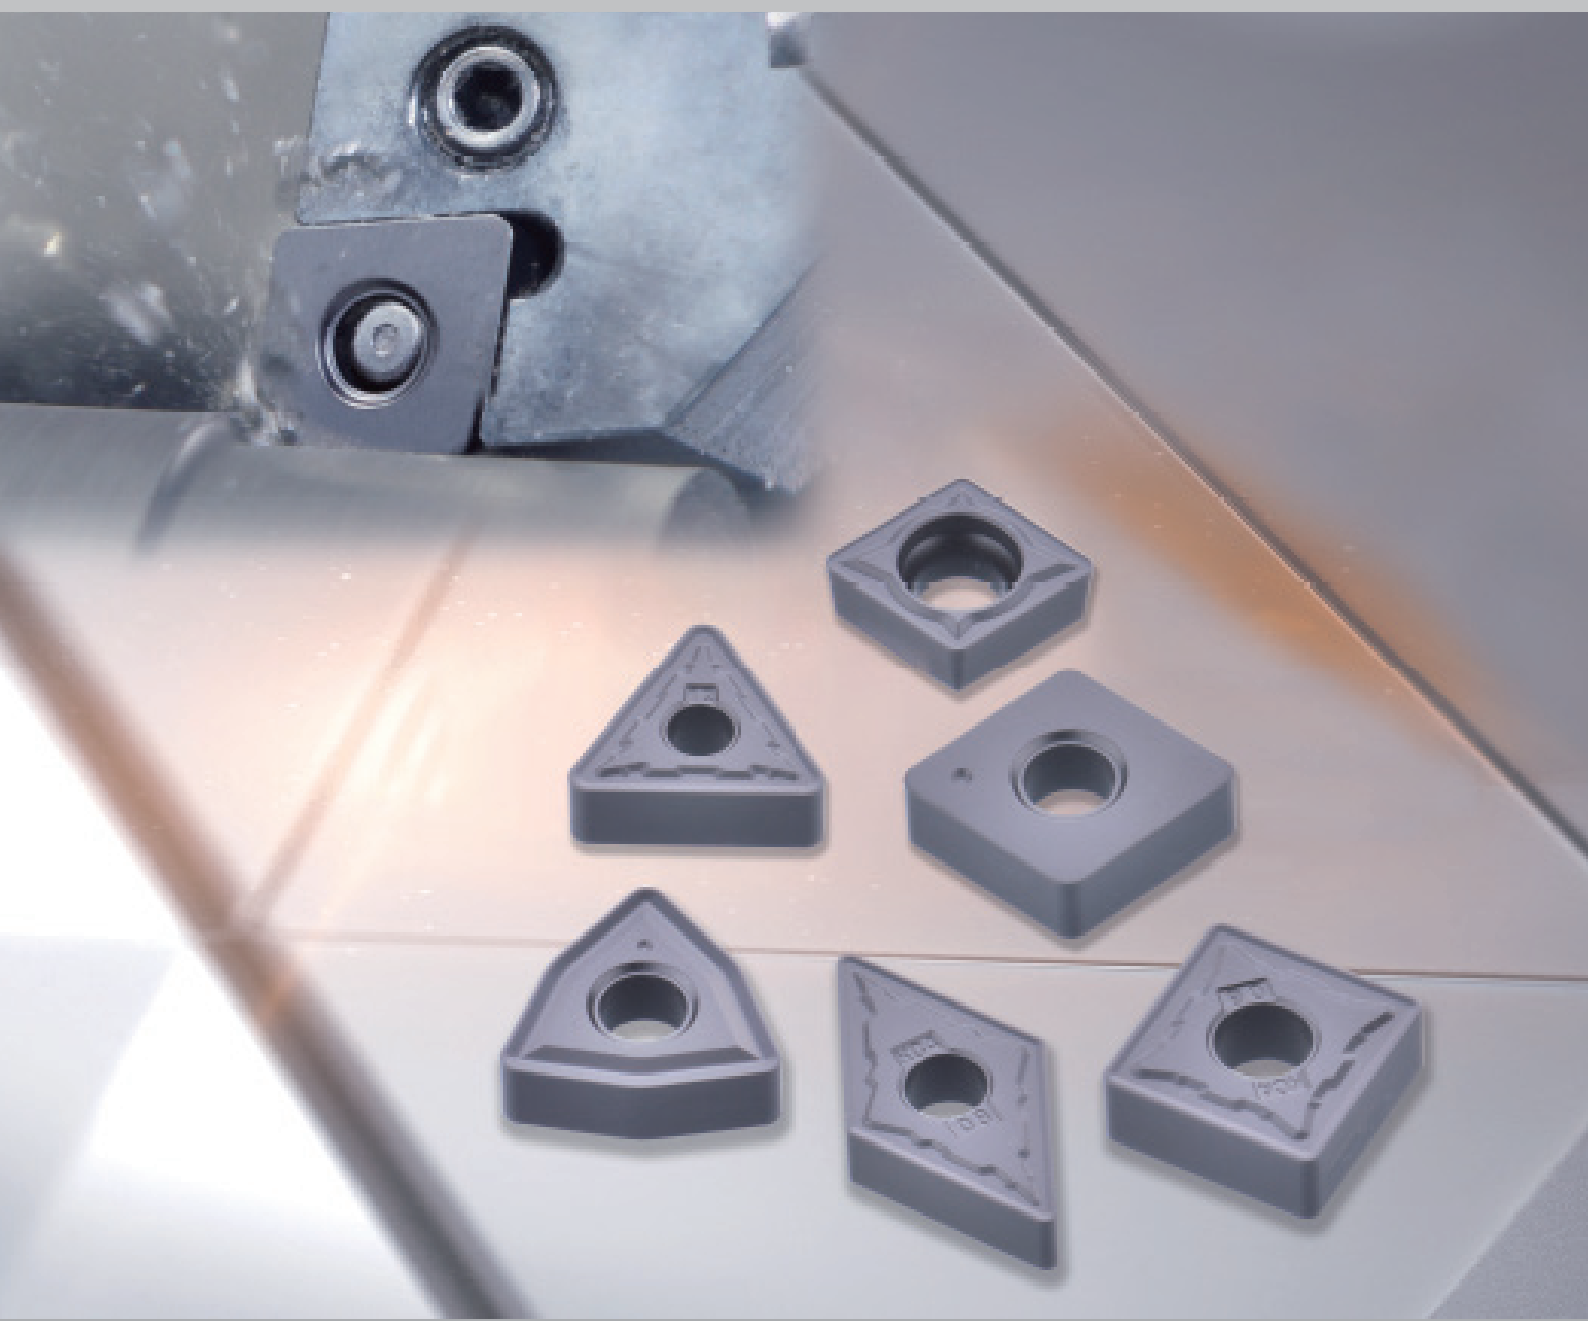
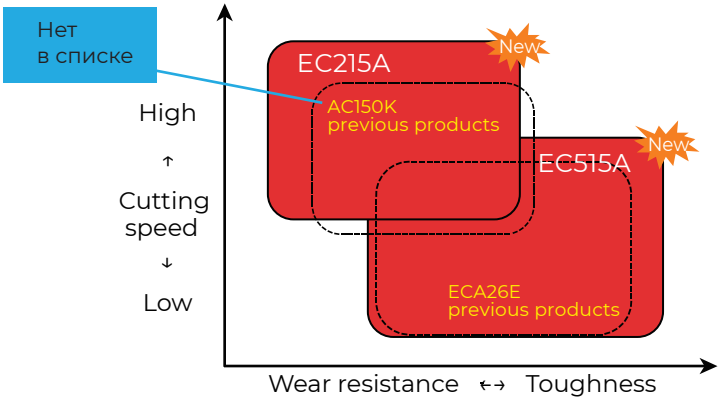
New generation of cast iron turning grade



New cast iron turning grades EC215A / EC515A

With the newly developed coating technology and cutting edge treatment technology, the new grades fully cover gray cast iron and nodular cast iron high-speed machining to general machining, and achieve stable and longer tool life.

EC215A / EC515A application scope



EC215A

Excellent wear resistance can be achieved in high-speed and high-efficient cast iron machining. By adopting ultra thick coating and nano structured coating technology, it can realize ultra-high speed machining at 600 m / min.

EC515A

1st option for cast iron maching. The new nano-structured coating technology can form high-strength and high wear resistance CVD coating and realize stable long tool life during cast iron machining.
